

HEIDI D. SATO

EDUCATION

PhD, Health Sciences, November 2007
International Health Practitioner
TUI University, Cypress
Dissertation: Mathematical Model to Predict Foodborne Illness Outbreaks at Restaurants

M.P.H., Population and Family Health, October 1989
Columbia University, New York

B.S., Nutrition and Food Science, December 1987
University of California, Berkeley

PROFESSIONAL EXPERIENCE

Assistant Professor of Health Sciences

College of Health Sciences, TUI University, December 2000 to Present

Conduct online lectures and discussions for doctoral level research seminar course. Advise doctoral students regarding research design, methodology, and analysis. Also designed and taught courses in epidemiology, emergency & disaster management, issues of terrorism, and culminating project courses for graduate and undergraduate students. Developed and updated course CDs using MS FrontPage. Participate on dissertation committees and curriculum evaluation committees.

Senior Epidemiology Consultant

EpiTech Consulting, April 2006 to Present

Provide consultation on epidemiologic methodology and analysis, transmission of infectious diseases, and outbreak investigation and surveillance procedures. Expert witness for a high profile hepatitis A outbreak involving 650 cases at a restaurant. Provide consultation to client attorney regarding the source of the outbreak

Epidemiologist / Chief of MIS-Informatics Unit

Environmental Health, Los Angeles County Dept. of Health Services, October 1998 to January 2007

- Supervised 20 staff within the MIS-Informatics Unit, including Environmental Health Specialists, Information Systems Analysts, and Data Entry Clerks. Provided technical guidance to staff on data queries and analysis of inspection data for management, the media, and the public. Also advised Information Systems Analysts on the design and development of database applications, automation for improving efficiency in data analysis, and on technical support issues. Managed the hiring of new staff within the unit.
- Conducted epidemiological analysis of restaurant inspection and housing program and provided recommendations to senior management. Provided consultation to department staff regarding epidemiologic research methodology, sample size, and design. Also attended meetings with the Director of Public Health & Health Officer for Los Angeles County to advise executive management on data analysis results for distribution of inspection scores among food establishments.
- Developed an award-winning database application that advises inspectors regarding the

validity, etiology, and probable source of a foodborne illness complaint. This application was developed using MS Access and Visual Basic. Also developed intranet site to automate notification of possible foodborne outbreaks.

- Managed the development of rich text format reports and data mapping conversion for the EDAPTS (electronic Development and Permit Tracking System), which is a multi-departmental web-based Oracle database application for tracking permits, inspections, complaints, and land use data.
- Collaborated in writing a *Vibrio vulnificus* position paper for the California Conference of Directors of Environmental Health to influence policymakers and present recommendations for preventing *Vibrio vulnificus* deaths in Los Angeles County, which led to an immediate change in policy.
- Collaborated in writing the Foodborne Illness Investigation Reference Manual.

Epidemiology Analyst

Acute Communicable Disease Control, Los Angeles County Dept. of Health Services, November 1991 to October 1998

Designed, conducted, and analyzed epidemiological surveys and investigations of epidemics to determine the pattern of disease in the community. Managed surveillance for shigellosis, campylobacteriosis, and vectorborne diseases. Provided consultation to physicians, nurses, and the public regarding disease control. Interviewed on-camera about AIDS prevention for a video production. Investigated over 60 outbreaks of communicable disease, including

- Cholera Associated with an International Airline Flight, 1992
- Viral Gastroenteritis Outbreak Aboard a Cruise Ship, 1992
- Salmonella Poona Outbreak Associated with Exposure to Iguanas, 1992
- Epidemiologic Investigation of Meningococcal Disease in Los Angeles County, 1993
- Hepatitis B Virus Transmission Associated With Thoracic Surgery, 1993
- E Coli O157:H7 Outbreak in Los Angeles County

Consultant

American Lung Association, Los Angeles County, November 1991 to March 1992

Provided consultation for the African American and Asian Pacific Islander Smoking Cessation Project; reviewed participant evaluations and made recommendations for the modification of the program curriculum that was copyrighted and published by the American Lung Association. Also wrote recommendations for future activities for a grant proposal.

Project Manager

American Lung Association, Los Angeles County, September 1990 to November 1991

Designed, implemented, and evaluated smoking cessation programs for African American and Asian Pacific teens. Conducted monthly advisory committee meetings.

Graduate Research Assistant

School of Public Health, Columbia University, February 1989 to September 1989

Conducted literature search and identified appropriate indicators to use for assessing the nutritional status of school-age children in New York State. Designed instrument for data collection; collected nutritional data from selected school sites, and analyzed data using SPSS software.

Laboratory Assistant

Medical Science Institute, Beverly Hills, June 1988 to September 1988

Tested for the presence of syphilis, mononucleosis, rheumatoid arthritis, C-reactive protein, beta-hemolytic streptococcus, and anti-nucleotide antibody. Operated the Coulter S-Plus, the

Coulter Jr., and the Coulter STKR to determine blood counts. Supervised weekend blood testing operations.

Intern

World Health Organization in Geneva, Switzerland, January 1988 to May 1988

Collected and managed nutrition and disease data from countries throughout the world using Data Base 111+; determined global prevalences of under- and over-nutrition using various cut-off points and analyzed data to determine the correlation between nutritional status and diarrheal disease.

Ministry of Health and University of Ghana Medical School, June 1987 to August 1987

Determined the prevalence of malnutrition in the villages of the Suhum region of West Africa for UNICEF's Weaning Food Production Project by taking anthropometric measurements and observing clinical signs of malnutrition; collected diet histories of children with marasmus and kwashiorkor. Educated and advised mothers about their children's nutritional status in primary health care and malnutrition clinics. Also surveyed village sanitation with health inspector; identified hazards for employees in factories, and developed strategies to minimize hazards with factory owners.

AWARDS

APHA Student Award, 2008

Awarded by American Public Health Association Epidemiology Section for research conducted as a PhD student: Mathematical Model to Predict Foodborne Outbreaks at Restaurants.

Excellence in Environmental Health Award, 2003

Awarded by California Conference of Directors of Environmental Health for developing *Foodborne Illness Advisor*, an automated database to enhance surveillance, screening, and analysis of foodborne illness complaints.

Productivity and Quality Award, 2003

Awarded by Los Angeles County Board of Supervisors for developing *Foodborne Illness Advisor*.

Employee Suggestion Award, 2002

Awarded Certificate of Commendation for developing *Foodborne Illness Advisor* by the Director of Los Angeles County Department of Health Services. This database application resulted in a cost savings of \$51,000 per year.
